New TV 1.0.6 — Note for tester

This is the first submission of New TV.

- **No test account is needed.** On the first (activation) screen press **OK** on **"Watch demo"** to open the full app with sample channels, program guide, catch-up and movies.
- New TV is an IPTV player and contains no content of its own. Users add their provider's playlist in **Settings > My playlist** (M3U/M3U8 or Xtream get.php link), or a provider links a playlist to the device code shown on the start screen. There is no login, password, sign-up or payment in the app.
- Interface language follows the TV language; it can be changed in Settings > Language.
- BACK on the main screen asks for confirmation; press BACK twice to exit.
- Magic Remote: pointer clicks and wheel scrolling are supported.
